It is our duly of the country how t support his success or, Andrew Jackson, (ap planse.) and I am giad to be able to say that he is orthy of the support of the people. Ihavel had abundant opportunities to know his charater: for I have been in consultation with his at all hours of the day and night, when I had charge of the Department of Ohio, and I have charge of the Department of One, and I have been enabled to descern his occurse manufely or all matters which required his judgment and attention. Having but these opportunities, I can say to you that he has acted at all times with ability, real, and discretion. I tell you, geutlemen, that I have never known him to take a drop of liquor, and I have never seen him under its influence. If it were otherwise would have discovered it, for I have been con in nally with him. There were moments when I ld have, if possible, read the thoughts of h soul, and I can truly say, after baving enjoyed the most intimate relations with him, that he is worthy of our confidence. I believe the indiscretion with which he was charged on the 4th of March can be explained away. Let his who is without sin cast a stone at him. Let the nation then support him as their President (Applaus.) That becomes the duty of all of us

Let us stand by him, and strengthen his hands and the hands of the government. The course before us all in this hour is plain. Let us rally round our President-[cheers for Johnson]—let us support him and do our whole duty to the country by aiding the Government in the great work before it. We have been called on to mourn the death of our President. I think he had talent and patriotism above any man of the age. I know that he deserves the sincere regret of every man; and I can also say that in his untimely end the South have lost their best friend. [Cries of "That's mo," and applause.]

duty is to support the Government and our net President, Andrew Johnson. [Applause.]

Previous to this address Gen. Burnside was accested by a friend in William street, who, aware of his intimacy with Mr. Johnon, asked him about his character as a citien and his fitness for the high position which has devolved on him; the General replied; I know Mr. Johnson well. He was Military Governor of East Tennessee when I commanded the West. For some time he was in Louisville nati, when I met him at all hours of and Concinnati, when I met him at an instance the day and night, and in the most important consultations, and I can say I never saw him taste liquor of any kind, and never saw him when I thought he had tasted figure. He was se drunkard then. In my opinion he is a firm, and talented statesman.
